

Aurora Energy Pty Ltd

Aurora Energy, Tasmania's Government owned electricity distribution and retail company is now providing unique ultra high-speed data services to Government and Corporate customers. Aurora has signed an agreement with the Tasmania Government to supply telecommunications services to Agencies under the Networking Tasmania Contract (NT11).

Aurora is the only supplier of “**Dark Fibre Services**” to Government Agencies under NT11 and is currently developing high bandwidth active service. Aurora operates and manages over 150kms of optic fibre within Tasmania. This network is continually expanding as further customer and core business requirements are identified and implemented.

The past two years have seen Aurora further develop its telecommunications capability through trials of two unique telecommunication products, BPL (Broadband Over Power Line) www.tastel.com.au/bpl and “TasCOLT” an FTTN (fibre-to-the-home) www.tascolt.com.au. Both projects utilise Aurora's optic fibre network

Aurora's optical fibre infrastructure also provides valuable high-speed data services to the health, research and education communities in Tasmania.

A dedicated telecommunications group of experienced personnel build, manage and operate Aurora's telecommunications infrastructure. This group is also responsible for technical and account management support to customers.
