

Networking Tasmania

enabling Tasmania's digital transformation

Networking Tasmania provides an extensive range of innovative, high-quality services that safeguard the Government's information assets and IT applications, and secure information flows within organisations and to the public.

Our Networking Tasmania suppliers provide enterprise-grade, turnkey data networking solutions, from cybersecurity to NBN-based connections and in-building Wi-Fi, all delivered as-a-service.

Networking Tasmania helps Tasmanian organisations achieve:

- **secure** 'anytime, anywhere' access to information and ICT services
- **safeguarded** sharing of information and technologies across partnering organisations

By leveraging the combined demand of all eligible organisations, Networking Tasmania allows valued Tasmanian suppliers to negotiate and deliver world-class solutions in the local marketplace.

Why Networking Tasmania?

Networking Tasmania services can enable:

- Community organisations to work together at temporary sites to respond to emergencies
- Local councils to collaborate to deliver services across regions in Tasmania
- Utilities (water, power) to use remote technology to meet stringent engineering, environmental and operating standards
- Teachers and students to access learning resources and submit work from any location, any time

Networking Tasmania helps Tasmanian organisations serve Tasmanian communities – 24 hours a day, 365 days a year – by delivering critical services that support lifelong learning, mobile working solutions, emergency services, critical infrastructure and connected communities.

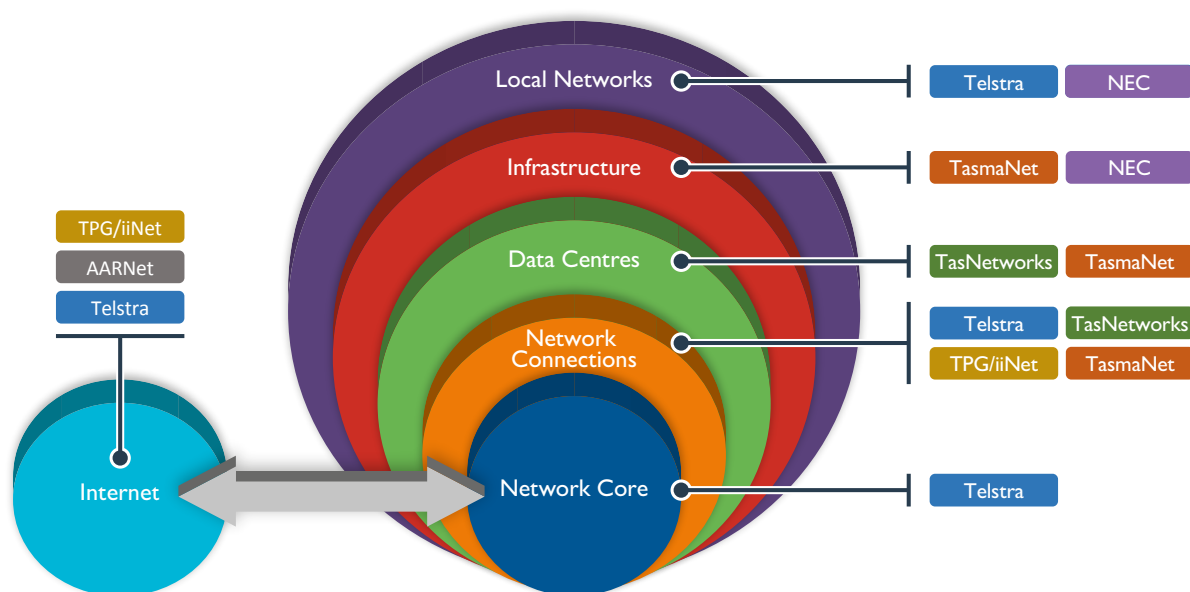

What services are available through Networking Tasmania?

Networking Tasmania provides:

- **Core services** – highly available, integrated, network core services, delivering switching and routing across the network as well as security, gateways and other central services
- **Value-added services** – including load balancing, content filtering, domain name and IP address management
- **Connection services** – end-to-end-managed wide area network (WAN) services, connecting sites to other sites and to the network core
- **Internet services** – filtered internet feed, including access to AARNet for eligible education and research organisations
- **Data Centre as a Service (DCaaS)** – secure, robust data centre facilities, in Tasmania, where customers can locate their own or their suppliers' computing infrastructure
- **Infrastructure as a Service (IaaS, also known as cloud services)** – deployment and maintenance of computing infrastructure where customers can host their information and applications, with higher-layer service options
- **Local Area Networking as a Service (LANaaS)** – deployment and management of in-building network services, including Wi-Fi

Who uses Networking Tasmania and where is it available?

Tasmanian Government agencies, Government Business Enterprises, statutory authorities, state-owned companies, local government authorities, private schools and hospitals, and a range of other government-funded and not-for-profit non-government organisations are eligible to use the services provided by Networking Tasmania.

Networking Tasmania provides extensive coverage across urban, rural and remote Tasmania.

“Networking Tasmania’s Infrastructure as a Service offering has allowed our small team to focus on developing existing skill sets to support our business, enabling our staff to do more with less.”

Nathan O’Brien
IT Infrastructure Manager
Sustainable Timber Tasmania

Why use Networking Tasmania?

Networking Tasmania gives you access to diverse, resilient state-wide telecommunications infrastructure, to support your critical applications.

Networking Tasmania's as-a-service model means:

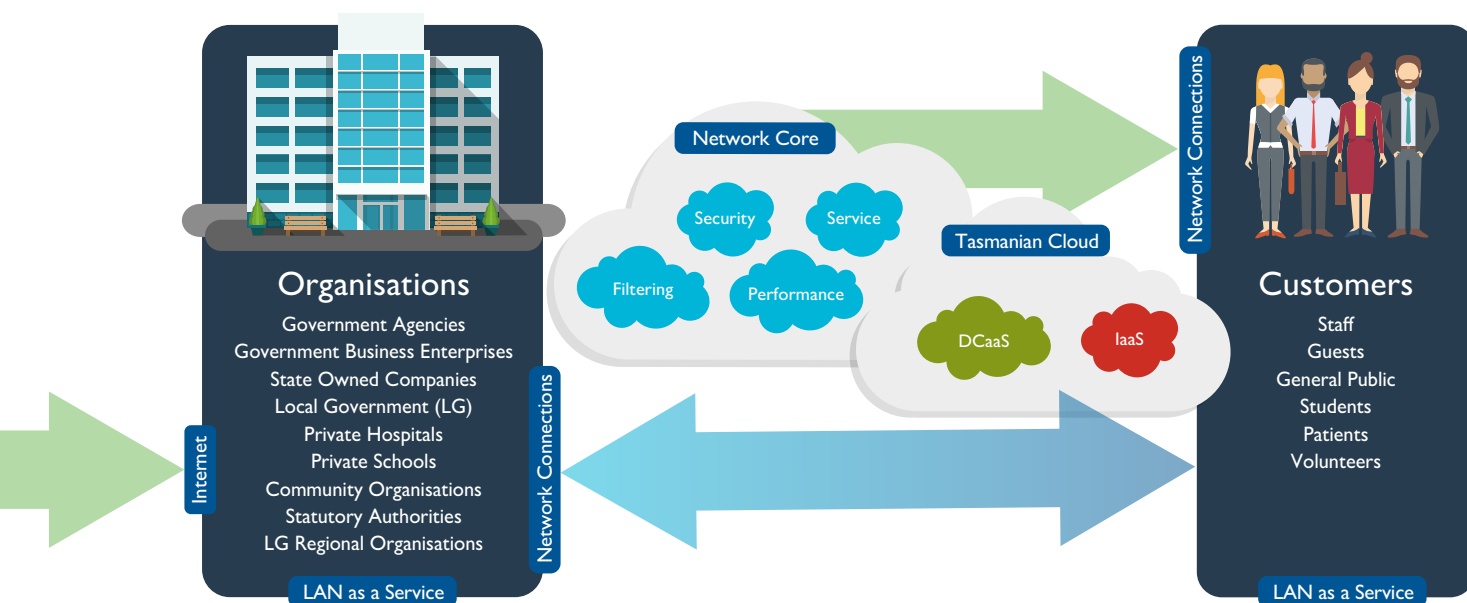

- No ownership of infrastructure or operational responsibilities
- You pay for what you use, with costs allocated on attributes such as the number of active ports or Wi-Fi access points
- Scalable solutions that allow for incremental increases and decreases in services
- Your staff no longer have to be experts in everything
- You are not locked in to lengthy arrangements, with most services ordered on 14-day cancellation terms
- You can use operating expenditure, not capital expenditure, avoiding the funding peaks associated with major capital asset procurement or replacement
- Your costs are reduced through more efficient use of assets and systems

Networking Tasmania's use of small panels gives you:

- Competitive pricing and service offerings
- Rapid access to multiple technical solutions
- Specialist skills through locally-based technical teams
- The option of choosing single or multiple suppliers
- Capacity to rapidly deploy to new sites around Tasmania

All Networking Tasmania services are underpinned by a comprehensive contract management regime that gives you:

- Contracted service levels, including performance metrics, service reporting and automatic rebates for breaches
- Regular price and service reviews, ensuring continued competitive pricing and up-to-date service development

“Networking Tasmania gives us the flexibility to engage the most appropriate supplier for each individual site, whether it is in Hobart, Stanley or King Island.”

Mark Vosper
Manager Information Technology
Tasports

What about cyber security?

Networking Tasmania protects the security, integrity and availability of your information assets through security practices based on industry standards, such as ISO 27001. These supplier security practices are regularly audited and reviewed to ensure compliance with the Government's requirements.

Enhanced security activities include:

- Continuous review and development of security measures as the global cybersecurity landscape changes, in accordance with Tasmanian Government ICT security policies and procedures
- A highly available core service that supports secure carriage of information transmitted to, from, and within the Networking Tasmania customer network
- Supporting security technologies, such as firewalls, intrusion prevention systems, proxy and content filtering and anti-malware detection
- Support for 'anytime, anywhere' remote and mobile access
- Highly reliable gateways that filter network traffic
- Filtering and scanning for malicious email content

How do I buy from Networking Tasmania?

Eligible customers may apply to purchase services directly from any Networking Tasmania supplier. The Department of Premier and Cabinet has already established comprehensive standing offer agreements with these suppliers, using fair, transparent and open procurement processes.

The Department also undertakes:

- Performance monitoring and escalation of issues
- Quality assurance, benchmarking and pricing reviews
- Development of new services and product innovation
- Ordering of common services
